Project Summary – Futo's Online Portfolio

1) My final project is my friend, Futo Wada's, art portfolio. Futo is an animator here at USC. Her online portfolio should be easy to navigate as well as distinct enough to showcase her unique work and personality to the best of its ability (without going overboard) for job opportunities.

2) Extras:

    a. Javascript (jQuery) for homepage, to make menu switch from slightly transparent at the top, to fixed + opaque when the user scrolls fully past it (in main.js).

    b. Transformation + Javascript (jQuery), to make each page fade in upon load.

    c. Form (the contact page)

    d. Iframes (the animation page)
